NOTE

These cases are engineered to operate in locations not exceeding 75°F and 55% R.H. These cases are designed to operate using R452a refrigerant. Alternate refrigerants available by special order. O.A. length includes (2) ends at 1-1/2" each. Ventilation grills at front and back cannot be blocked. B.T.U.'s are calculated at 14°F (evaporator) and 90°F (ambient). Remote cases are provided with an expansion valve and a liquid solenoid for pump down cycle. On remote cases, if no floor drain is provided, a condensate evaporating pan must be ordered and 6.7 amps added to the amp load. Remote cases must be hard wired – no plugs.
