

HCM450 CUTTER MIXER

**Salsa**

**Salad**

**Cheese**

**Zucchini Bread**

**Coleslaw**

**Tomato Sauce**

**HCM450**

- 5 H.P. Motor
- 45-Quart Capacity

Operating Instructions and Recipe Guidelines

Proud supporter of you.®

# Welcome!

. . . to a new world of incredibly fast, incredibly easy food preparation, thanks to your Hobart HCM450 cutter mixer. This versatile machine lets you cut, mix, blend or emulsify in just seconds . . . so you can prepare more foods in much less time than ever before. Foods like sandwich fillings, salad dressings, cakes, icings, yeast doughs, pastries, bread crumbs and many other everyday items.

The first section of this brochure covers operating and cleaning procedures for your Hobart HCM450. The second section explains the special methods necessary to prepare a variety of items, including the recommended sequences for adding ingredients. It also contains helpful hints for adapting your existing recipes to the HCM450. Follow these instructions carefully, and your Hobart HCM450 will become one of the most productive pieces of equipment in your kitchen.

# Recipes

To help you put the HCM to better use in your foodservice operation, we've put together these basic recipes to illustrate the varied uses for the HCM450 and to assist you in adapting your own successful recipes to this unique and versatile piece of equipment.

These recipes, however, are not designed to fit everyone's needs and likes. Therefore, use them as a guideline for developing your own special recipes suited to your own particular needs.

# HCM450 Standard Features

# Loading your HCM450

**1. LOCK BOWL.** Raise the bowl tilt lever to "Hold" position.

**2. UNLATCH COVER.** Holding cover handle in left hand, pull the cover latch toward you.

**3. OPEN COVER.** Grasp cover handle and pull cover up.

**4. INSERT ATTACHMENT.** Slide attachment onto center shaft. Rotate until it drops down over square part of center shaft. Make sure attachment drops completely into place.

**5. LOCK ATTACHMENT.** Use the twist lock knob furnished. Simply line up the notch on the knob with the notch on top of the attachment shaft. Place knob over shaft and push down until flush with top of shaft. Twist in either direction until tight.

**6. INSERT MIXING BAFFLE (WHEN REQUIRED).** With the cover still upright, hold the baffle in right hand with scraper at bottom. Insert baffle shaft through hole cover. Press firmly against cover.

**7. ATTACH BAFFLE HANDLE.** Hold baffle handle in left hand with lock knob upright and large knob of baffle handle at bottom, and slide round pin over the mixing baffle shaft and into groove.

**8. LOCK BAFFLE.** Rotate lock knob downward until it stops.

**9. ADD INGREDIENTS.** Follow the recommended procedures outlined in the preparation section of this brochure.

**10. LOCK COVER.** Grasp cover handle and pull cover down into closed position. Press cover handle down before rotating cover latch away from you.

**NOTE:** Do not store attachments in bowl.

# Operating your HCM450

**NOTE:** Bowl must be in upright position and cover must be latched. An electric interlock prevents operation when bowl cover is open, or bowl is tilted more than 20°. In order for the HCM to operate, the timer must be set for a designated time or in the "HOLD" position.

## To operate in the RUN (continuous) method:

1. **SET TIMER.** To desired time or on "Hold".

2. **PRESS START SWITCH AND RELEASE.** Machine will run until stop button is pressed or, until selected time has expired.

3. **PRESS RED STOP BUTTON.** A built-in brake will quickly stop the attachment shaft when power has been turned off.

## To operate in the JOG (on-off bursts) method:

1. **SET TIMER ON "JOG".**

2. **PRESS START SWITCH AND HOLD.** Machine will run until switch is released.

3. **RELEASE START SWITCH.** Machine will automatically brake to a stop. Continue pressing the start switch for as many on-off bursts as necessary.

## To operate mixing baffle:

The mixing baffle is used to turn product away from the sides of the bowl and into the knives. To operate, rotate at least one full turn clockwise, and then quickly back up one quarter turn counterclockwise. This backwards motion will allow the product to drop into the knives.

The mixing baffle is not required for all products. Refer to the preparation section (pages 9-12) for details.

## To add liquids while operating:

Insert a large funnel into the hollow mixing baffle shaft (or hole in cover when baffle is not being used). Then pour liquid ingredients through funnel into bowl.

**NOTE:** Use the rubber cover scraper when processing liquid products that may splash. When processing dry products, we recommend that the scraper be removed for easier baffle operation.

# Unloading your HCM450

**1. UNLATCH AND OPEN COVER.** Be sure to wait until shaft has stopped turning.

**2. SCRAPE COVER AND MIXING BAFFLE.** The cover scraper will remove most product from the cover. To remove remaining product use rubber scraper.

**3. REMOVE MIXING BAFFLE.**

**4. REMOVE ATTACHMENT.**

**5. UNLOCK BOWL.** Lower the bowl tilt lever to the "Tilt" position.

**6. REMOVE PRODUCT.** Tilt bowl by grasping cover handle and pulling toward yourself. Remove product with scraper or by hand. Pour liquids slowly and scrape bowl with rubber scraper.

# Using your Strainer Basket

The HCM strainer basket acts as a colander, letting you cut and remove soft, leafy vegetables such as head lettuce for salads. Use cold water.

**1. INSERT STRAINER BASKET.** Do *not* use the mixing baffle when using the strainer basket.

**2. INSERT CUT/MIX ATTACHMENT.**

**3. ADD WATER AND PRODUCT.** Fill bowl approximately two-thirds full with cold water so product floats. Close and lock cover.

**4. USE "JOG" METHOD. NOTE:** You may wish to practice jog method with water only in the bowl.

**5. OPEN COVER AND REMOVE CUT/MIX ATTACHMENT.**

**6. REMOVE STRAINER BASKET.** Grip handles and raise strainer basket. Drain and transfer product. The bowl water can be re-used for another batch.

# Cleaning your HCM450

**1. REMOVE ATTACHMENT.** Wash in sink or dishwasher.

**2. REMOVE MIXING BAFFLE.** Wash in sink or dishwasher. Rubber scraper is dishwasher-safe.

**3. ADD WATER AND DETERGENT.** Pour one gallon of hot water and a small amount of low-suds detergent into bowl.

**4. WASH BOWL AND BOWL COVER WITH SOFT CLOTH.**

**5. TILT BOWL, POUR OUT WASH WATER.** Return bowl to upright position.

**6. ADD RINSE WATER.** Use one gallon of hot water for rinsing.

**7. RINSE BOWL AND COVER THOROUGHLY.**

**8. TILT BOWL, POUR OUT RINSE WATER.**

**9. WIPE DRY WITH SOFT CLOTH.**

**10. RETURN BOWL TO UPRIGHT POSITION.**

**11. REMOVE BOWL SEAL AND RETAINER RING**

**12. CLEAN BOWL SEAL AND RETAINER RING.** Bowl seal and retainer ring easily snap on and off without tools. Wash if necessary, and dry. Replace and close cover.

**NOTE:** Do not store attachments inside bowl.

## Operating Hints

- Because the HCM is so fast, it is most important that the running time be closely controlled. **WHEN IN DOUBT, CUT THE TIME SHORT.** Stop the machine frequently to examine the product, and run a few more seconds if necessary. Once a product is over-cut or over-mixed, the process cannot be reversed.
- Use the cut/mix attachment if in doubt as to the proper attachment.
- After preparation of liquid products such as cake batter or mayonnaise, extensive hand scraping of the knife attachment can be avoided by replacing the attachment after the bowl has been emptied and returned to upright position. Run the machine for a few seconds. This will spin off most of the residue onto the bowl sides, which can then be easily scraped.
- Check proper attachment prior to each use to be sure it is securely locked and bowl seal is in place.
- When cutting minimum amounts, be sure to distribute product load evenly in bowl.
- Knife edges can be touched up as needed with a honing stone.
- Do not exceed 80% bowl capacity when using liquids.
- Do not exceed the recommended maximum capacities.
- Remember that the strainer basket and mixing baffle are never used together.
- When pouring in liquids thru hole in cover, use a large funnel.
- The timer will be most effective for controlling the mixing time of products such as yeast dough, meat emulsions, mixing liquids, etc.

# Preparation Hints Vegetables, Salads, Meats and Cheese

- When recipe calls for long items such as celery stalks, pre-cut product into shorter lengths that will more easily drop into knives. This will also allow more product to be placed in the bowl.
- When cutting products of various densities, firmer vegetables such as radishes and carrots can be pre-sliced in a Hobart 9" vegetable slicer, or pre-chopped (in water) in the HCM, before being added to leafy vegetables. Make sure knives are sharp.
- When using the "jog" method to prepare tossed salad, stop and check after each jog for desired particle size.
- When processing meat, first remove gristle and tendons.
- When reducing large or bulky items (cheese, celery stalks, large chunks of meat, etc.) to a fine-cut product:
  - A. Limit product size (product must be free to drop into knives.)
  - B. Without mixing baffle, run HCM briefly to break down the large or hard chunks.
  - C. With baffle in place, add balance of ingredients for final cutting and mixing; i.e., potato salad or ham salad.
  - D. For best results, cheese should be chilled to 38° and meats to 30° before cutting.
  - E. When cutting large, tempered chunks of meat (about 30°F). DO NOT overload the machine (maximum 30 lbs. in HCM450). Do not attempt to cut product below 28°F.

## Baked Products

- Use tap water (about 70°F) in all yeast formulas.
- Dried egg powder can be added along with other dry ingredients. However, the amount of liquid called for in the recipe must be increased by the amount necessary to reconstitute the dried eggs. As an alternate method, reconstitute the dried eggs in a Hobart mixer.

## Scheduling of Products

You can save a great deal of time, whenever possible, by scheduling production of items so the HCM will not have to be cleaned between products. Products can often be prepared in a sequence where the small amount of residue remaining will be compatible with the next product. For example:

1. Prepare bread crumbs. Empty bowl and wipe out any particles.
2. Prepare tossed salad. Empty bowl and wipe out any particles.
3. Prepare mayonnaise. Scrape bowl.
4. Prepare cole slaw. Scrape bowl.
5. Prepare ham salad. Scrape bowl.
6. Prepare meat loaf.

# HCM450 Preparation Procedures

## BREAD DOUGH

**TYPE OF PRODUCTS:** White Bread, Hard Rolls, Bagels, Pizza

**CAPACITY:** *Minimum* – 18 lbs.; *Maximum* – 36 lbs.

**METHOD:** RUN (continuous) – Use timer

**TIME:** 2½-3 minutes

**ACCESSORIES:** Knead/Mix Attachment (Remove Mixing Baffle)

### PROCEDURE:

1. Place required liquids in bowl (70°F tap water, milk, etc.).
2. Add yeast and agitate in bowl with rubber scraper (yeast should be dissolved).
3. Add remainder of dry ingredients (flour, salt, sugar, etc.). Last, add shortening chunks or oil.
4. Set proper time.
5. Turn on and run for approximately 2½-3 minutes, or until the dough has been properly developed. Turn off.
6. If the dough needs to be mixed longer, pull it free from the bowl sides and knead/mix attachment. This will give the motor a better chance to start before it encounters a load.
7. Open cover, remove knead/mix attachment, scrape and empty bowl.

**NOTE:** Retard dough for 30 minutes before handling.

## CAKE BATTER

**CAPACITY:** *Minimum* – 25 lbs.; *Maximum* – 60 lbs.

**METHOD:** RUN (continuous) – Use timer

**TIME:** 2½-4 minutes

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle

### PROCEDURE:

1. Add liquid to bowl (water or milk – except eggs).
2. Add cake flour, baking powder, sugar, seasonings, etc.
3. Close and latch cover.
4. Set timer.
5. Turn on, rotate mixing baffle. Run continuously for 2 minutes. Turn off.
6. Open cover, scrape bowl and cover to ensure all ingredients are mixed.
7. Add eggs, close and latch cover.
8. Turn on for approximately 1-2 minutes making sure to rotate mixing baffle. Turn off.
9. Open cover, remove cut/mix attachment; scrape and empty bowl.

## PIE DOUGH

---

**CAPACITY:** *Minimum* – 15 lbs.; *Maximum* – 30 lbs.

**METHOD:** JOG – Set timer on “HOLD”

**TIME:** 30 seconds

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle

**PROCEDURE:**

1. Shortening or lard should be in “fist-size” chunks and *very cold*.
2. Place flour and salt in bowl (add milk powder if used).
3. Add cold shortening or lard on top of dry ingredients.
4. Close and latch cover.
5. Jog to cut shortening or lard into flour while rotating mixing baffle until flour/shortening mixture is “pea size”.
6. Open cover; add proper amount of cold water.
7. Close cover and jog approximately 4 times while rotating mixing baffle or until properly mixed.
8. Open cover, remove cut/mix attachment; scrape and empty bowl.
9. Store in refrigerator for later use.

## MEAT LOAF

---

**TYPE PRODUCTS:** Meat Loaf, Ham Loaf, Salmon or Tuna Loaf; Meat Balls or Patties; Fish Croquettes; Stuffed Peppers or Cabbage filling

**CAPACITY:** *Minimum* – 20 lbs.; *Maximum* – 30 lbs.

**METHOD:** RUN then JOG – Timer not recommended

**TIME:** 1-1½ minutes

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle

**PROCEDURE:**

1. Meat should be lean (with gristle removed), ground or in chunks, chilled to 40°F.
2. Place liquids in bowl (tomato juice, stock, eggs, milk, etc.)
3. Add all ingredients except meat and rice – seasonings, onion (fresh or dehydrated), bread crumbs, green peppers, soy protein, etc.
4. Close and latch cover.
5. With switch in RUN position, turn on machine and rotate mixing baffle for about one minute to blend seasonings and chop vegetables. Turn off.
6. Open cover, add chilled ground meat or meat chunks. Add rice for stuffed pepper and cabbage filling.
7. Close and latch bowl cover. Move switch to JOG position. Jog until product is blended, while rotating mixing baffle. **DO NOT OVERMIX!**
8. Open cover, remove cut/mix attachment; scrape and empty bowl.
9. Form into loaves, patties, balls or croquettes.

**NOTE:** Do not exceed two-thirds the capacity of the HCM when blending meats. Over-filling requires additional running time, reduces proper movement of contents for blending, and may yield an overmixed product. When mixing minimum quantities, vegetables (celery, onions, green peppers, etc.) must be pre-chopped prior to being used in the HCM.

## FROSTINGS/ICINGS

---

**CAPACITY:** *Minimum* – 25 lbs.; *Maximum* – 65 lbs.

**METHOD:** RUN (continuous) – Use timer

**TIME:** 2-3 minutes

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle

**PROCEDURE:**

1. Add liquids to bowl (milk, water, flavorings).
2. Add dry ingredients (sugar, seasonings). Powdered sugar does not have to be sifted.
3. Add cold shortening, margarine or butter in “fist-size” chunks on top of dry ingredients.
4. Close and latch cover.
5. Set timer for 1 minute, rotate mixing baffle.
6. Open cover, scrape bowl and cover.
7. Close and latch cover. Run approximately 1-2 minutes more for final blending. Turn off.
8. Open cover, remove cut/mix attachment; scrape and empty bowl.

## CHICKEN SALAD

---

**TYPE PRODUCTS:** Egg Salad, Beef Salad, Luncheon Meat Salad, Chicken Salad, Bologna or Mock Ham Salad, Salmon or Tuna Salad

**CAPACITY:** *Minimum* – 20 lbs.; *Maximum* – 40 lbs.

**METHOD:** RUN, then JOG – Timer not recommended

**TIME:** 1-1½ minutes

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle

**PROCEDURE:**

1. Place base dressing (mayonnaise or salad-type in bowl with fresh, cleaned celery, drained pickles (whole or cut), seasonings, etc.)
2. Close and latch cover.
3. With switch in RUN position, turn on and rotate mixing baffle for 30 seconds, or until desired consistency is obtained. Turn off.
4. Open cover. Add large chunks of chilled, cooked meat and whole hard-cooked eggs.
5. Close and latch cover.
6. Move switch to JOG position. Jog three to four times while rotating mixing baffle until the desired chunk size is obtained.
7. Open cover, remove cut/mix attachment; scrape and empty bowl.

**NOTE:** Softer or smaller chunks of meat should be cut only two or three times using the Jog method.

## COLE SLAW *(Vinegar or Mayonnaise type)*

**CAPACITY:** *Minimum* – 20 lbs.; *Maximum* – 35 lbs.

**METHOD:** RUN (continuous) — Timer not recommended

**TIME:** 15-20 seconds

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle

**PROCEDURE:**

1. Place all ingredients in bowl. (Cabbage should be cored—carrots should be pre-chopped).
2. Close and latch cover.
3. Turn on and rotate mixing baffle for 15 to 20 seconds or until desired particle size is obtained.
4. Open cover, remove cut/mix attachment; scrape and empty bowl.

## THOUSAND ISLAND DRESSING

**CAPACITY:** *Minimum* – 16 qts.; *Maximum* – 32 qts.

**METHOD:** RUN (continuous) — Use Timer

**TIME:** 1 minute

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle

**PROCEDURE:**

1. Start with base dressing (mayonnaise or salad-type) in bowl.
2. Add DRAINED whole pickles or relish, whole hard-cooked eggs, onions (whole or halved), chili sauce, seasonings, green pepper halves, etc.
3. Close and latch cover.
4. Set timer.
5. Turn on and rotate mixing baffle for approximately 60 seconds. Check for desired particle size.
6. Scrape down. Repeat until product is of acceptable consistency.
7. Open cover, remove cut/mix attachment; scrape and empty bowl.

## MAYONNAISE *(Whole-Egg type)*

**CAPACITY:** *Minimum* – 16 qts.; *Maximum* – 32 qts.

**METHOD:** RUN (continuous) — Use Timer

**TIME:** 3 minutes

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle

**PROCEDURE:**

1. Place whole eggs in bowl. (If dried whole eggs are used, reconstitute them with water in bowl.)
2. Pour seasonings in bowl (salt, sugar, dry mustard, etc.).
3. Close and latch cover. Insert funnel into mixing baffle hole. Set timer. Turn on.
4. Pour two-thirds of the required oil into bowl through funnel.
5. Add entire amount of vinegar and lemon juice.
6. Pour remaining oil into bowl. Remove funnel.
7. Continue to run for 60 seconds, rotating mixing baffle. Turn off and scrape sides. Run for additional 30 seconds.
8. Open cover, remove cut/mix attachment; scrape and empty bowl.

## POTATO SALAD

**CAPACITY:** *Minimum* – 25 lbs.; *Maximum* – 40 lbs.

**METHOD:** RUN, then JOG — Timer not recommended

**TIME:** 15-30 seconds

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle

**PROCEDURE:**

1. Cooked potatoes should be cooled to about 40°F. (DO NOT OVERCOOK — overcooked potatoes will fall apart.)
2. Put base dressing (mayonnaise or salad-type) in bowl.
3. Add the following ingredients: whole celery, drained pickles (whole or cut), vinegar, seasonings, mustard, drained pimentos, etc.
4. Close and latch cover.
5. With switch in RUN position, turn on for 15 seconds to pre-mix seasonings and chop ingredients while rotating mixing baffle. Turn off.
6. Scrape bowl and cover.
7. Add cold cooked potatoes and hard-cooked eggs.
8. Close and latch cover.
9. Move switch to JOG position. Jog four to five times while rotating mixing baffle or until potato chunks are the desired size.
10. Open cover, remove cut/mix attachment; scrape and empty bowl.

**NOTE:** Use Jog method ONLY after potatoes are added. If the continuous method is used the product will become mushy.

## TOSSED SALAD

**CAPACITY:** *Minimum* – 6 heads; *Maximum* – 8-10 heads

**METHOD:** JOG — Set Timer on "HOLD"

**TIME:** 1-3 jogs

**ACCESSORIES:** Cut/Mix Attachment, Strainer Basket (Remove Mixing Baffle)

**PROCEDURE:**

1. Lettuce should be cleaned and cored in advance. Drain well and refrigerate in plastic bags until used.
2. Other vegetables should be sliced, chopped or shredded in advance. Refrigerate in bulk quantity until used.
3. With baffle removed, place strainer basket in bowl. Lock cut/mix attachment in place.
4. Fill bowl two-thirds full of cold water.
5. Float heads of lettuce (cores removed) in the water.\*
6. Close and latch cover.
7. Jog one to two times and check product for particle size. If smaller pieces are desired, cut again.
8. Open cover, remove cut/mix attachment; raise strainer basket and drain water back into bowl. Empty basket before cutting another batch in the same water.

**\*NOTE:** If too many heads of lettuce are placed in the HCM at once, uniform particle size will not be achieved.

## BREAD OR CAKE CRUMBS

---

**TYPE PRODUCTS:** Stale, fresh or frozen bread or rolls; stale cake (icing removed)

**CAPACITY:** *Minimum* – 3 lbs.; *Maximum* – 8 lbs.

**METHOD:** RUN (continuous) – Use Timer

**TIME:** 2 minutes

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle

**PROCEDURE:**

1. Place sliced or whole loaves of bread (include heels) or cake pieces loosely in bowl.
2. Rotate mixing baffle clockwise while closing cover. Latch.
3. Set timer.
4. Turn on and run while rotating mixing baffle until desired consistency is obtained. Turn off.
5. Open cover, remove cut/mix attachment; scrape and empty bowl.

**NOTE:** For course bread dressing use jog method.

## CHOPPED/BLENDED CHEESE

---

**TYPE PRODUCTS:** Pizza Cheese, Romano, Parmesan, Mozzarella, Processed Cheese

**CAPACITY:** *Minimum* – 15 lbs.; *Maximum* – 20 lbs.

**METHOD:** JOG, then RUN – Timer not recommended

**TIME:** 20-30 seconds

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle (Start without baffle)

**PROCEDURE:**

1. Cut cheese into approximately two to three-pound chunks. Chill to 38°F.
2. Place chilled chunks in bowl
3. Close and latch cover. Make sure baffle has been removed.
4. With switch in JOG position, turn on and jog for approximately 10 seconds. Turn off.
5. Open cover and insert mixing baffle. Close and latch cover.
6. Move switch to RUN position. Turn on and rotate mixing baffle until desired chunk size is obtained. Turn off.
7. Open cover, remove cut/mix attachment; scrape and empty bowl.

**NOTE:** The softer the cheese, the colder it should be for chopping without smearing.

## WHIPPED POTATOES *(Instant Mix)*

---

**CAPACITY:** *Minimum* – 16 qts.; *Maximum* – 35 qts.

**METHOD:** RUN (continuous) – Use Timer

**TIME:** 1 minute

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle

**PROCEDURE:**

1. Place hot water (180°F) in bowl.
2. Add milk, margarine and seasonings.
3. Add instant potato mix.
4. Close and latch cover.
5. Set timer.
6. Turn on and run for 30 seconds while rotating mixing baffle. Turn off.
7. Scrape cover, sides and bottom of bowl.
8. Close and latch cover; run for an additional 30 seconds using mixing baffle.
9. Open cover, remove cut/mix attachment; scrape and empty bowl.

## SAUSAGE

---

**CAPACITY:** *Minimum* – 20 lbs.; *Maximum* – 30 lbs.

**METHOD:** RUN (continuous) – Timer not recommended

**TIME:** 1 minute (vary according to desired consistency)

**ACCESSORIES:** Cut/Mix Attachment, Mixing Baffle

**PROCEDURE:**

1. Meat and trimmings should be chilled to 28°-38°F, cut into approximately three-pound or smaller chunks.
2. Place meat into bowl. Make sure bowl seal is in place.
3. Pour seasonings (salt, pepper, sage, oregano, etc.) into bowl, on top of meat product.
4. Close and latch cover.
5. Turn on and run until sausage is of the desired consistency. Rotate baffle clockwise.
6. Open cover, remove cut/mix attachment; scrape and empty bowl.

## CRUSHED ICE

---

**CAPACITY:** *Minimum* – 20 lbs.; *Maximum* – 35 lbs.

**METHOD:** RUN (continuous) – Timer not recommended

**TIME:** 30 seconds

**ACCESSORIES:** Cut/Mix Attachment

**PROCEDURE:**

1. Place ice\* in HCM bowl. Close and latch cover.
2. Set timer on hold.
3. With selector in RUN, press START and continue running until desired particle size is attained.

\***NOTE:** DO NOT use large blocks of ice. Ice cubes or fist-size chunks of ice are recommended to avoid possible damage to the HCM blades.

# WHITE BREAD DOUGH

EQUIPMENT		APPROXIMATE YIELD
Knead/Mix Shaft		<b>Weight:</b> 25½ lb. <b>Portions:</b> 21 - 1¼ lb. loaves
INGREDIENTS		DIRECTIONS
15 lb. Flour, all-purpose 8 lb. 4 oz. Water, warm (70°F) 6 oz. Yeast, compressed 12 oz. Shortening, chunks 6 oz. Salt 12 oz. Sugar, granulated 12 oz. Non-Fat Dry Milk Powder	<ol style="list-style-type: none"> <li>1. Dissolve yeast in water in HCM bowl, then add remaining ingredients with shortening added last.</li> <li>2. Set timer for 2½ minutes. With selector in RUN, press START. Machine will stop when time expires.</li> <li>3. Check dough development and temperature*. If necessary, pull dough away from knead/mix shaft and continue mixing for an additional ½ minute.</li> <li>4. Transfer dough to a large greased pan and allow to proof for approximately 35 minutes.</li> <li>5. Scale 1¼ lb. of dough for each loaf. Knead gently and shape into loaves. Place in greased loaf pans and allow dough to rise in a warm place for an additional 45 minutes.</li> <li>6. Bake in convection oven at 350°F for approximately 30 minutes. Remove immediately from pans to cooling racks.</li> </ol> <p>*NOTE: Temperature of dough should not exceed 110°F.</p>	

# WHOLE WHEAT BREAD DOUGH

EQUIPMENT		APPROXIMATE YIELD
Knead/Mix Shaft		<b>Weight:</b> 27¾ lb. <b>Portions:</b> 22 - 1¼ lb. loaves
INGREDIENTS		DIRECTIONS
7 lb. 8 oz. Flour, whole wheat 7 lb. 8 oz. Flour, all-purpose 9 lb. Water, warm (70°F) 12 oz. Yeast, compressed 6 oz. Salt 12 oz. Sugar, granulated 1 lb. 2 oz. Shortening, chunks 12 oz. Non-Fat Dry Milk Powder	<ol style="list-style-type: none"> <li>1. Dissolve yeast in water in HCM bowl, then add remaining ingredients with shortening added last.</li> <li>2. Set timer for 2½ minutes. With selector in RUN, press START. Machine will stop when time expires.</li> <li>3. Check dough development and temperature*. If necessary, pull dough away from knead/mix shaft and continue mixing for an additional ½ minute.</li> <li>4. Transfer dough to a large greased pan and allow to proof for approximately 35 minutes.</li> <li>5. Scale 1¼ lb. of dough for each loaf. Knead gently and shape into loaves. Place in greased loaf pans and allow dough to rise in a warm place for an additional 45 minutes.</li> <li>6. Bake in convection oven at 350°F for approximately 30 minutes. Remove immediately from pans to cooling racks.</li> </ol> <p>*NOTE: Temperature of dough should not exceed 110°F.</p>	

# PIZZA DOUGH

EQUIPMENT		APPROXIMATE YIELD
Knead/Mix Shaft		<b>Weight:</b> 29 lb.
INGREDIENTS		DIRECTIONS
10 lb.	Water, warm (70°F)	Add water and yeast. When using dry yeast, let sit in bowl for 5 minutes to activate yeast. 1. Place all ingredients in HCM bowl. 2. Set timer for 2 minutes. With selector in RUN, press START. Machine will stop when time expires. 3. Scrape down bowl and continue mixing another ½ - 1 minute until product is well blended. 4. Use as desired.  <b>NOTE:</b> Temperature of dough should not exceed 110°F.
6 oz.	Yeast, compressed <i>or</i>	
2½ oz.	Dry Yeast	
4 oz.	Salt	
18 lb.	Flour	
8 oz.	Oil or Shortening	

# PIE DOUGH

EQUIPMENT		APPROXIMATE YIELD
Cut/Mix Shaft Mixing Baffle		<b>Weight:</b> 20 lb.
INGREDIENTS		DIRECTIONS
2 lb. 8 oz.	Lard, cold, chunks	1. Place all ingredients EXCEPT water in HCM bowl. 2. Set timer on hold. 3. With selector in JOG, press and release START while alternately rotating mixing baffle. 4. Continue until mixture has pea-sized particles. STOP. 5. Add cold water and continue to JOG until thoroughly mixed. 6. Use as desired.
6 lb.	Shortening, cold, chunks	
11 lb. 4 oz.	Flour, all-purpose	
5 cups	Water, cold	
3 oz.	Salt	

# ZUCCHINI BREAD
