Glass Door Merchandisers Refrigerators

**Model: TGM-11RV-N6** 

### \_\_\_\_ FEATURES & BENEFITS =\_\_

## ■ Hydrocarbon refrigerants (R-600a)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet the new standards of the EPA and DOE in 2017. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

#### Hot gas condensate system

Through Turbo Air's creative innovation, the condensate system surfaces have been specially treated to resist corrosion. This not only increases efficiency without the risk of refrigerant leakage from corrosion, but also prevents the overflow of condensate water.

#### Double pane glass doors with Low-E glass

Energy saving double pane glass doors are equipped with Lowemissivity glass, which reduces outer heat gain and decreases energy consumption. It enhances energy efficiency and minimizes condensation. Lightweight door construction also reduces door maintenance and bushing wear, which in turn facilitates smoother door opening.

### ■ High-density polyurethane insulation

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

- Adjustable, heavy duty, PE (polyethylene) coated wire shelves
- LED lighting interior
- Refrigerator holds 33°F ~ 38°F for the best in beverage preservation
