Conforms to NSF/ANSI 4

Warranty
(1) year parts and labor

The Krampouz Single Electric Waffle Maker with 90° opening is the professional waffle maker for commercial use, renowned for its build quality and reliability. Here's a description of its features:

Single Plate Design It features a single large waffle plate, allowing you to make one waffle at a time. This design is ideal for small to medium-sized establishments or for home use where space may be limited.

Large Cooking Surface Despite being a single plate design, the cooking surface is generous, allowing you to make large, Belgian-style waffles with ease. This ensures uniform cooking and perfect browning every time.

Heavy-Duty Construction Built with durability in mind, this waffle maker is constructed from high-quality materials, including stainless steel, ensuring longevity even with frequent use in a commercial setting.

Precise Temperature Control It is equipped with precise temperature control, allowing you to adjust the heat to achieve the perfect level of crispiness and browning for your waffles.

Indicator Lights It features indicator lights that signal when the waffle maker is heated up and ready to use, making it easy to know when to pour your batter for optimal results.

Easy to Clean The non-stick cooking surface and removable drip tray make cleaning up a breeze, saving you time and effort after each use.

Versatile While primarily designed for making delicious waffles, this machine can also be used to cook other items like pancakes or even grilled sandwiches, adding versatility to your kitchen equipment.

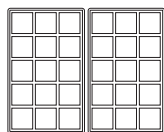

Compact Design Despite its commercial-grade performance, it boasts a relatively compact footprint, making it suitable for kitchens with limited counter space.
