Intertek 4001921

Conforms to ANS/UL Std. 197. Cert. to CAN/CSA Std. C22.2 No. 109

Conforms to NSF/ANSI 4

Warranty
(1) year parts and labor

The Krampouz Swivel Waffle Maker is a professional waffle maker known for its high quality construction and versatility. Here are some common descriptions and features:

Swivel Design One of the outstanding features of the Krampouz waffle iron is its swivel design. This allows the user to easily rotate the plates for even batter distribution and even cooking.

Double cooking plates Many models of Krampouz waffle irons come with dual cooking plates, allowing users to cook multiple waffles at the same time. This feature is especially useful for busy kitchens or when cooking for a crowd.

Adjustable temperature control Waffle makers typically come with adjustable temperature controls, allowing users to adjust the cooking temperature based on their preferences and the type of batter being used.

Non-Stick Coating The cooking plates of Krampouz waffle irons are often coated with a non-stick surface, making it easy to remove waffles once they are cooked and reducing the need for excessive oil or butter.

Durable construction Krampouz is known for its durable construction, with many of its waffle irons featuring stainless steel housings and heavy-duty components that are built to last.

Versatility While primarily designed for making traditional Belgian-style waffles, some models of Krampouz waffle irons also come with inter-changeable plates or accessories that allow users to make other types of waffles or even pancakes.

Easy to clean The non-stick cooking plates and removable drip tray make Krampouz waffle irons easy to clean, saving time and effort in busy kitchens.
